Experience

Omega Labs **Oct. 2024 – Dec. 2025 · June, 2026 – Oct. 2026**
Founding Engineer *Toronto, Remote*

- Designed an LLM decision loop where a planner proposes actions, a judge filters them, and code picks 1.
- Moved screen understanding on-device using a local MLX vision model, and parsed Gmail to detect open threads.
- Wrote an eval harness of 8 synthetic personas with LLM-graded replays and XCUITest gates in CI.
- Set up coding agents to work off GitHub issue specs and proof-backed PRs, shipping 350+ commits to TestFlight.
- Wired Screenpipe into a cross-platform Electron recorder, stitching local captures with FFmpeg for Gemini.
- Streamed real-time 2-way voice with turn detection and an orb that reacts to the audio output.

FolioX **Dec. 2023 – Sept. 2024**
Founding Engineer & Lead Software Engineer *Remote*

- Designed and built Tagzz, a blockchain identity system mapping multiple wallets to a single readable identity, with backend services and SDKs for smart contract interaction.
- Led frontend architecture and design systems; shipped a new website that expanded customer reach.
- Architected liquid staking, restaking, and liquidity aggregation platforms and built full-stack crypto portfolio tools.

Ngram **Jan. 2023 – Aug. 2023**
Software Development Engineer Intern *San Francisco, Remote*

- Improved product visibility through SEO-focused sitemap restructuring.
- Built backend utilities including rate limiting, scheduled jobs, and data processing workflows.
- Worked with large language models to extract and structure insights from scraped data.

Nuance Communications **May 2022 – July 2022**
Software Engineering Intern *Pune, Remote*

- Worked on UI and API integrations for a voice-based clinical documentation product.
- Resolved production issues and added test coverage using TDD practices.

OnboardStudio OÜ **Mar. 2022 – July 2022**
Co-Founder & Software Developer *Estonia, Remote*

- Co-founded and built a full-stack knowledge management platform for DAO teams.
- Handled CI/CD and infrastructure; helped secure $20,000 in grants.

Projects

Call Me, Voice Agents over a Phone Call **June 2026**
FastAPI, WebSockets, Twilio, Whisper, Llama 3.1, Cartesia, Silero VAD, Docker, Cloud Run

- Built a real-time voice AI agent for phone calls with sentence-level pipelining for sub-second response latency.
- Designed emotion-tag prompting that maps LLM cues to TTS delivery for in-character, expressive speech.
- Shipped a production CI/CD pipeline on GCP with custom domain routing via a self-built Load Balancer.

LifeOffline, Instagram saved content extractor **June 2026**
FastAPI, Playwright, instaloader, Whisper, WebSockets, Next.js

- Scraped and structured 2,300+ Instagram posts into a clean LLM-ready corpus with captions and on-device transcripts
- 3-stage media pipeline with rate-limit handling, retry logic, and anonymous/authenticated download fallback
- Live activity log streaming progress in real-time via WebSocket over a filterable SQLite data layer

Technical Skills

Languages: TypeScript, Python, SQL, Swift
AI: LLM orchestration, evals, RAG, MCP, real-time voice pipelines (STT/TTS, VAD), on-device inference (MLX)
Frontend: React, Next.js, Electron, SwiftUI
Backend: FastAPI, Node.js, PostgreSQL, Redis, WebSockets
Tools: Playwright, Docker, GCP, Supabase, Vercel

Education

Indian Institute of Information Technology, Pune **Aug. 2019 – June 2023**
B.Tech in Computer Science and Engineering

- CGPA: 8.3 / 10.0
